### UM PROGRAM OFFERS EIGHT SUMMER WILDERNESS STUDY EXPEDITIONS

MISSOULA--

Eight wildlife, wildland and wild river projects will be offered by the University of Montana in its "Montana's Wild Country" summer program.

The wilderness study expeditions are for everyone actively interested in environmental issues. Participants will learn modern wildland research techniques, acquire information useful in making crucial decisions on public policy that affects wilderness and wildlife, and have an opportunity to reflect on humanistic and ecological traditions.

The expeditions will be of value to graduating high school students interested in the environment; college students studying ecology, wildlife biology, environmental studies, outdoor recreation and other wilderness disciplines; corporate professionals; government resource specialists; school teachers; outdoor program resource leaders; land managers; and scientists interested in research.

The projects are: Missouri River Breaks, June 14-July 5; Wolves in the Northern Rockies, July 5-17; Northwestern Montana's Grizzlies, July 19-30; Mountains & Rivers Without End, July 19-Aug. 8; Organization and Leadership of Outdoor and Wilderness Programs, Aug. 9-18; Nature and Human Nature, Aug. 20-Sept. 11; Wilderness and America, Aug. 9-29; Rocky Mountain Front & Bob Marshall Wilderness Management Practicum, Aug. 27-Sept. 18.

Details about fees and other aspects of the program are available from the Center for Continuing Education and Summer Programs, 125 Main Hall, University of Montana, Missoula, MT 59812. Enrollment is limited.
